SQL ASSIGNMENT 3: DATA MANIPULATION & MODIFICATION

Subject: Database Management Systems (SQL) **Topic:** DML (INSERT, UPDATE, DELETE) **Status:** Completed

TASK 1: TABLE CREATION

Create a table named `Playlist` with columns: `id` (integer, primary key), `song_name` (varchar), `artist` (varchar), and `duration` (integer).

```
CREATE TABLE Playlist ( id INT PRIMARY KEY, song_name VARCHAR(100), artist VARCHAR(100), duration INT );
```

TASK 2: RECORD INSERTION (SINGLE & MULTI-ROW)

Insert four sample track records into the `Playlist` table including songs by AP Dhillon, Arjit Singh, and Unknown Artist.

```
-- Single record insertion INSERT INTO Playlist (id, song_name, artist, duration) VALUES (1, 'Excuses', 'AP Dhillon', 195); -- Multi-row insertion INSERT INTO Playlist (id, song_name, artist, duration) VALUES (2, 'Kesariya', 'Arjit Singh', 268), (3, 'With You', 'AP Dhillon', 214), (4, 'Short Intro', 'Unknown Artist', 90);
```

TASK 3: UPDATING RECORD INFORMATION

Correct the spelling of artist name from 'Arjit Singh' to 'Arijit Singh' for the song with ID 2.

```
UPDATE Playlist SET artist = 'Arijit Singh' WHERE id = 2;
```

TASK 4: CONDITIONAL ROW DELETION

Delete all records from the `Playlist` table where the song duration is less than 120 seconds.

```
DELETE FROM Playlist WHERE duration < 120;
```

TASK 5: CONDITIONAL SONG NAME UPDATE

Update the song names by appending ' (Remix)' for all tracks by 'AP Dhillon' with a duration greater than 180 seconds.

```
UPDATE Playlist SET song_name = CONCAT(song_name, ' (Remix)') WHERE artist = 'AP Dhillon' AND duration > 180;
```
